

Subject Index to Volume 9

A

Acetylcholine
 muscarinic receptor activation, blood flow and, coronary, H941
 release, neural control, heart, H431
Acidosis, insulin effects, cardiac, H636
Acid phosphatase, cathepsin D content, starvation-induced atrophy, heart, H222
Acid ribonuclease, cathepsin D content, starvation-induced atrophy, heart, H222
Action potential: *see* Potentials
Activation energy: *see* Energy
Actomyosin, natural, calcium ion sensitivity, infarction, cardiac, H704
Acylation, spontaneous hypertension, aortic, H33
Acy carnitine, substrate effects, ischemic heart, H391
Acyl CoA, substrate effects, ischemic heart, H391
Adenosine
 dipyridamole and, cerebral blood flow, H775
 formation sites, heart, H963
 muscarinic receptor activation, blood flow and, coronary, H941
 vasa vasorum nourishment, aortic wall, H781
Adenosine deaminase, formation sites, heart, H963
Adenosine diphosphate, platelet accumulation and release (pig), H99
Adenosine kinase, formation sites, heart, H963
Adenosine monophosphate, cyclic cardiac relaxation, H441
 levels, paired stimulus effects, heart, H441
 neural sympathetic stimulation, H630
 protein kinase, diabetes effects, myocardial, H375
Adenosine triphosphatase activities, sarcolemmal, taurine effects, heart failure, H238
 oligomycin-sensitive, myocardial ischemia (pig), H308
Adenosine triphosphate, microregions, left ventricular subendocardium, H804
S-Adenosylhomocysteine hydrolase, adenosine formation, heart, H963
 β -Adrenergic blockade: *see* Blockade
 α -Adrenergic blockers, coronary vasoconstriction, H493
 β -Adrenergic innervation, inhibitory, relaxation, mesenteric lymphatics, H498
Adrenergic mechanisms, intralobar pulmonary arteries and veins, H274
Adrenergic receptors: *see* Receptors
Adrenoreceptor: *see* Receptors
Afferent nerves
 cardiac, contrasting reflexes, coronary occlusion, H620
 cardiopulmonary, carotid pressor response inhibition, H555
 sympathetic, contrasting reflex effects,

coronary occlusion, H620
Aging
 arterial baroreceptor reflexes, racing (greyhound), H383
 pulmonary hypertension, chronic hypoxia, H62
 transcapillary pressure changes (Starling), H843
Albumin
 transmural diffusion, arterial stretch effects, H645
 transmural transport, aortic (dog, human, pig), H54
Alkaline phosphatase, adenosine formation, heart, H963
Alloxan diabetes: *see* Diabetes
Aminopyrine, permeability, capillaries (frog), H597
Amphiphiles
 coronary arteries and, H229
 erythrocytes and, H222
 perfused hearts and, H229
Anemia, blood flow, cerebral, H209
Anephric state, vasopressin, catecholamines, plasma volume and, H827
Angiography, volume measurement, ventricular, H896
Angiotensin
 analogs, pressor responses, renal artery stenosis, H862
 blockade: *see* Blockade
 competitive antagonists, pressor responses, renal artery stenosis, H862
 congeners, bradykinin potentiation, H255
 hypertension, renovascular, H788
 pressor responses, renal artery stenosis, H862
 receptor, antagonists, coronary vasoconstriction, H493
 relaxation, renal and cerebral arteries, H247
Angiotensin-converting enzyme, bradykinin potentiation, H255
Angiotensin I, vascular effects, intrarenal, H914
Angiotensin II
 antagonists, stenosis, renal artery, H2
 pressor response, volume expansion effects, pregnancy (ewe), H908
 $\text{Sar}^1, \text{Ile}^8$ -labeled, pressor responses, renal artery stenosis, H2, H827
 vascular effects, intrarenal, H914
Anhidrosis, ectodermal dysplasia, vasodilation, H571
Anoxia
 insulin effects, cardiac, H636
 ventricular tachyarrhythmias, reperfusion- and digitalis-induced, H730
Ans a subclavia, left, cyclic nucleotides and norepinephrine stimulation, H630
Antagonists: *see* specific subject
Antipyrine, permeability, capillaries (frog), H597
Aorta
 baroreceptor deafferentation, body fluid changes, H685
constriction, RNA polymerase activity, muscle and nonmuscle cells, H901
flow, cinematographic analysis, H286
phospholipids, deacylation-reacylation cycle, spontaneous hypertension, H33
serum protein transport, concentration, time and location effects (dog, human, pig), H54
subcoronary stenosis, contractile function, H80
thoracic, protein transport (dog, human, pig), H54
vasa vasorum, nourishment and, H781
Aortic arch, isolated, dominant inhibition, H555
Aortic depressor nerve, carotid pressor response inhibition, H555
Aortic flow: *see* Flow
Aortic nerve
 depressor, dominant inhibition, H555
 transection, noradrenergic mechanisms after, H481
Aortic valve
 behavior, cinematography, H286
 closure, cinematography, H286
 opening, cinematography, H286
Aortic wall, nourishment, vasa vasorum and, H781
Apnea, cigarette smoke and, H584
Arachidonate, aortic phospholipids, spontaneous hypertension, H33
Arachidonic acid, 15-hydroperoxy, angiotensin-induced relaxation, renal and cerebral arteries, H247
Arrhythmias
 cardiac
 copper deficiency, electrocardiography, H185
 sympathetic neural effects, H590
 ventricular, anoxia effects, H730
Arterial baroreceptor: *see* Receptors
Arterial stretch
 Evan's blue dye transport, H645
 transmural albumin uptake, H645
Arterial transport, diffusive transmural, protein, aortic (dog, human, pig), H54
Arteries: *see also* Blood flow; Blood pressure; Hemodynamics; Muscle; Permeability; Pressure; Receptors; Reflexes; and the specific artery oxygen content, cerebral blood flow (lamb), H209
Arterioles
 cerebral, abnormalities, acute hypertension, H511
 system hypoxia effects, muscle microcirculation, H746
Aspirin, angiotensin-induced relaxation, renal and cerebral arteries, H247
Atherosclerosis
 arterial stretch effects, transmural albumin and Evan's blue dye transport, H645
 transmural protein transport, aortic (dog, human, pig), H54
Atria: *see* Heart atria
Atrial receptors: *see* Receptors

Atrioventricular reentrant tachycardia: *see* Tachycardia

Atropine
contractility, vascular smooth muscle, H971

muscarinic receptor activation, blood flow and, coronary, H941

Autonomic nervous system, cellular injury and, myocardial ischemia, H738

Autoregulation
acute hypertension, cerebral arterioles, H511

whole-body, salt loading hypertension, H361

Awake state
left ventricular regional function, ischemia effects, H413

preload changes, systolic pressure-diameter relations, H354

pulmonary injury and prostaglandin production, endotoxemia (sheep), H348

B

Bainbridge reflex: *see* Reflexes

Barium, cardiac muscle contracture, excitation-contraction coupling (mammal), H216

Baroreceptor reflexes: *see* Reflexes

Baroreceptor: *see* Receptors

Baroreceptors: *see* Receptors

Baroreflex: *see* Reflexes

Basal metabolism, oxygen consumption, cardiac, H39

Bile salts, amphiphile effects and, heart, H229

Biopsy, rapid-freezing transmural drill, cardiac, H126

Blockade

β -adrenergic, tachycardia, H874
angiotensin, hypertension, renovascular, H788

Blood, loss, cardiovascular effects, fetal (lamb), H45

Blood flow: *see also* Circulation; Microcirculation

arterial, venous congestion, local, hand, H980

capsaicin injection, skeletal muscle, H315
cardiac function and, collateral development, H811

cerebral

adenosine effects, H775
arterial oxygen content effects (lamb), H209

dipyridamole effects, H775

coronary, right ventricular hypertrophy (pony), H881

distribution, cardiovascular effects, hemorrhage, fetal (lamb), H45

femoral, lumbar nerve stimulation (swine), H505

hepatic capacitance responses, H18
high-energy phosphates and, subendocardium, left ventricular, H804

integral of inflow minus outflow, hepatic, H18

myocardial, mitochondrial enzyme defects, ischemia (pig), H308

peripheral, venous congestion, local, hand, H980

platelets (pig), H99

regional myocardial, arterial

hypertension, H855

regional, salt loading hypertension, H361
regulation, adenosine formation, coronary, H963

renin-angiotensin system, fetal (sheep), H848

sinoaortic reflexes, defense behaviors, H421

transmural distribution, muscarinic receptor activation, coronary, H941
visceral, defense behaviors, H421

Blood pressure

aortic nerve transection, H481

arterial, hypoxic tachycardia, H874

cardiogenic chemoreflex, prostaglandin F_{2 α} , H528

cigarette smoke and, H584

inhibition, left aortic nerve, H555

systemic hypoxia effects, muscle microcirculation, H746

Blood vessels, systemic hypoxia effects, muscle microcirculation, H746

Blood volume: *see also* Volume

Bainbridge reflex (baboon), H164

changes during exercise

oxygen delivery, H177

tissue oxygenation, H177

hypertension, H487

Bradycardia

carotid chemoreceptors, vagi and, H874

cigarette smoke and, H584

Bradykinin, potentiation, angiotensin congeners, H255

Brain, noradrenergic mechanisms, aortic nerve transection, H481

Brain stem, frontocortical pathway blockade, ventricular fibrillation prevention, ischemic heart, H156

Breathing: *see* Respiration

Butoxamine, injection, adrenoreceptor desensitization after, H691

Bypass, cardiopulmonary, potassium and verapamil cardioplegia, ischemic arrest, H326

C

Calcium

antagonists, coronary vasoconstriction, H493

binding, sarcolemmal, taurine effects, heart failure, H238

high, adenosine monophosphate, cyclic levels, heart, H441

metabolism, potassium and verapamil cardioplegia, ischemic arrest, H326

paradox heart failure, taurine effects, H238

sarcolemmal binding, cardiac contractility and, muscle preparations, H576

strophantidin inotropy, Purkinje fibers, cardiac, H561

Calcium ions

channel blockers, endotoxic shock, cardiac, H954

myocytes, metabolism, heart, H659

receptors: *see* Receptors sensitivity, actomyosin, coronary

occlusion, H704

cAMP: *see* Adenosine monophosphate, cyclic

Cannula, metal, cardiac relaxation indices, H669

Capacitance

hepatic

flow change responses, H18

venous pressure responses, H18

vascular resistance and, hypothermia, skin and skeletal muscle, H868

Capacitance vessels, venous

norepinephrine and tetrodotoxin, spontaneous hypertension, H837

Capillaries

density, oxygen exchange, muscle, H199

membrane, temperature effects, H29

microperfusion, temperature effects, H29

osmotic flow, heart, H448

permeability

antipyrine and aminopyrine (frog), H597

endotoxemia, lung (sheep), H348

reserve, oxygen exchange, muscle, H199

single, temperature effects on hydraulic conductivity, H29

transit times

frequency analysis, muscle, H199

oxygen exchange, muscle, H199

Capsaicin, injection, reflex cardiovascular response, skeletal muscle, H315

Captopril, endotoxic shock, cerebellum pressor effects, H368

Carbon dioxide

intramural tension, myocardial ischemia, H855

tension, systemic hypoxia, muscle microcirculation, H746

Cardiac arrhythmias: *see* Arrhythmias, cardiac

Cardiac cells, calcium ion tolerant, exogenous substrate utilization, H659

Cardiac conduction: *see* Conduction

Cardiac cycle, negative dP/dt, end of systole and, H676

Cardiac denervation: *see* Heart

Cardiac depression, endotoxic shock, H954

Cardiac function: *see* Heart

Cardiac muscle: *see* Muscle, heart

Cardiac nerves, sympathetic, hypoxic tachycardia, H874

Cardiac output

continuous positive-pressure effects, ventricular, H821

hemorrhage effects (chicken), H9

salt-loading hypertension, H361

sinoaortic reflexes, defense behaviors, H421

stenosis, renal artery, H2

Cardiac rhythm: *see* Rhythm

Cardioacceleratory reflex: *see* Reflexes

Cardioinhibitory reflex: *see* Reflexes

Cardioplegia, potassium and verapamil combination, ischemic arrest, H326

Cardiorespiratory interaction, (seal), H190

Cardiovascular changes

baroreceptor deafferentation, aortic, H685

renal artery stenosis, H2

Cardiovascular defense, sinoaortic reflexes, H421

Cardiovascular reflex: *see* Reflexes

Carotid chemoreceptor: *see* Receptors

Carotid occlusion, dominant inhibition, left aortic nerve, H555

Carotid pressor response: *see* Pressor response

Carotid sinus

baroreceptors: *see* Receptors

distension, ganglion transmission,

- cervical, H716
inhibition, cervical ganglion reflex, H716
perfusion, heart failure, H793
- Carotid sinus nerve**, tachycardia, hypoxic and cyanide-induced, H874
- Catecholamines**
cardiac
hypertrophy, renovascular hypertension, H408
sympathectomy, 6-hydroxydopamine and denervation, H889
hypertension, hypertonic saline-induced, H827
- Cathepsin D**, immunoreactive, starvation-induced atrophy, heart, H222
- Catheter**
fluid-filled, relaxation indices, cardiac, H669
indwelling, pulmonary hypertension, age and sex influences, H62
- Cell membranes**, amphiphile effects, H229
- Cells**: *see also* specific type
injury, autonomic nervous system, myocardial ischemia, H738
- Central nervous system**, oxygen tensions, spinal cord, H761
- Cerebellectomy**, pressor effect, endotoxin shock, H368
- Cerebellum**
compression, regional sympathetic outflows, H109
pressor effect, endotoxin shock, H368
- Cerebral arteries**
angiotensin-induced relaxation, H247
oxygen content effects, blood flow (lamb), H209
- Cerebral arterioles**, abnormalities, acute hypertension, H511
- Cerebral defense system**, ventricular fibrillation prevention, ischemic heart, H156
- Chemoreflex**: *see* Reflexes
- Choline**, neural control, heart, H431
- Cholinesterase**, neural control, heart, H431
- Chromatin-template activity**, myocardial hypertrophy, muscle and nonmuscle cells, H901
- Chromonar**, coronary artery vasodilation, H767
- Cinematography**, aortic valve behavior, H286
- Circulation**: *see also* Blood flow; Microcirculation
cutaneous, sweat gland absence, H571
femoral, lumbar nerve stimulation (swine), H505
neural control, coronary occlusion, H620
peripheral, angiotensin I and II effects, intrarenal, H914
prostaglandin D₂ effects, perinatal (goat, lamb), H755
pulmonary, β -adrenergic receptors, hypoxia effects, neonatal (lamb), H697
regional, baroreceptor reflexes, arterial, racing (greyhound), H383
- Circulatory filling pressure**: *see* Pressure
- Circulatory system**
convolution integral, multiple regression analysis, H133
transport function, multiple regression analysis, H133
- Circumflex ligation**, cellular injury, autonomic nervous system and, H738
- Coenzyme A**, synthesis, diabetes and
- fasting effects, heart, H606
Collagen, cardiac hypertrophy, renovascular hypertension, H408
- Collaterals**, cardiac function, blood flow and, H811
- Compliance**
blood flow and venous pressure, hepatic, H18
diastolic, ischemia effects, left ventricular, H413
pulmonary vascular, regional sympathetic outflows, H109
venous, hypertension, H487
- Computer studies**: *see* specific subject and site; *see also* Models
- Conduction**
cardiac, active force, developmental changes, H546
impulse, developmental changes, cardiac, H546
- Contractile force**, cardiac: *see* Muscle, heart
- Contractile function**, experimental aortic stenosis, H80
- Contractility**
cardiac: *see* Muscle, heart
heart: *see* Muscle, heart
muscle: *see* Muscle
- Contractions**: *see* Muscle
- Contracture**, cardiac: *see* Muscle, heart
- Converting enzyme**
angiotensin, bradykinin potentiation, H255
inhibition
renal hypertension, H408
sodium and angiotension effects, hypertension, renovascular, H788
- Cooling**
local, vascular responses, skin and skeletal muscle, H868
systemic, vascular response, skin and skeletal muscle, H868
- Copper**, deficiency, electrocardiography, H185
- Coronary artery**
amphiphile effects, H229
conduit vessel, measurement, H73
measurement, drugs and, H73
occlusion, arterial hypertension, myocardial ischemia and, H855
pressure, hyperemia, myocardial, H709
vasoconstriction, thromboxane A₂ induced, H493
vasoconstrictor chemoreflex, prostaglandin F₂-induced, H528
vasodilation, maximal, H767
- Coronary hemodynamics**: *see* Hemodynamics
- Coronary obstruction**, indicator dilution, resistance and transport increases, H262
- Coronary occlusion**
actomyosin, calcium ion sensitivity and troponin loss, H704
cardiac afferent nerves, contrasting reflex influences, H620
collateral development effects, H811
left ventricular wall thickness, regional, H293
insulin effects, cardiac, H636
ventricular tachyarrhythmias, anoxia effects, H730
- Dipyridamole**
adenosine and, cerebral blood flow, H775
coronary artery diameter, measurement, H73
- Coronary resistance**: *see* Resistance
- Coronary stenosis**: *see* Stenosis
- Coronary transport**, increase, obstruction, H262
- Coronary vascular reserve**, hypertrophy, blood flow, right ventricular (pony), H881
- Coronary vasoconstriction**: *see* Vasoconstriction
- Coronary vasodilation**: *see* Vasodilation
- Coupling**
excitation-contraction
barium-induced, cardiac muscle (mammal), H216
calcium binding and, muscle preparations, H576
exercise effects, myocardium, H472
hypothermic ischemic myocardium, H336
- Creatine phosphate**, microregions, left ventricular subendocardium, H804
- Cyanide**, tachycardia, carotid chemoreceptors and vagi, H874
- Cyclic adenosine monophosphate**: *see* Adenosine monophosphate, cyclic
- Cytochrome c**, exercise effects, myocardium, H472

D

- Dantrium**, sarcolemmal calcium binding, contractility and, cardiac, H576
- Deacylation-reacylation cycle**, aortic phospholipid, spontaneous hypertension, H33
- Decamethonium**, tachycardia, carotid chemoreceptors and vagi, H874
- Deconvolution**, circulatory system, multiple regression analysis, H133
- Denervation**
cardiac: *see* Heart
sinoauric., cardiovascular defense, H421
- Development**: *see also* Fetus; Newborn changes, impulse conduction, heart, H546
collateral, cardiac function and blood flow, H811
femoral circulatory response, lumbar nerve stimulation (swine), H505
- Dexamethasone**, angiotensin-induced relaxation, renal and cerebral arteries, H247
- Dextran**, acute pericardial tamponade, H49
- Diabetes**
alloxan, cAMP-protein kinase, myocardial, H375
coenzyme A synthesis regulation, heart, H606
- Diastole**, left ventricular pressure, ischemic arrest, H300
- Diastolic compliance**: *see* Compliance
- Diastolic mechanics**, ischemia effects, left ventricular, H413
- Diastolic pressure**: *see* Pressure
- Diet**: *see* Feeding, and the specific dietary constituent
- Diffusion**, lateral, lipophilic solutes (frog), H597
- Digitalis**
insulin effects, cardiac, H636
ventricular tachyarrhythmias, anoxia effects, H730
- Dipyridamole**
adenosine and, cerebral blood flow, H775
coronary artery diameter, measurement, H73

Drinking, baroreceptor deafferentation, aortic, body fluid changes after, H685
 Ductus arteriosus, glucocorticoid effects, preterm (infant and lamb), H430
 Dyes: see specific dye

E

Edema
 pulmonary hemorrhagic, regional sympathetic outflows, H109
 transcapillary pressures, fetal, newborn, pregnant adult (Starling), H843
Efferent nerves sympathetic, cardiac: see Cardiac nerves
Electrical activity, insulin effects, cardiac, H636
Electrocardiography, copper deficiency, H185
Electrogenic pump: see Pump
Electrolytes
 cell, ischemic arrest, H116
 plasma, hemorrhage effects (chicken), H9
Electron microscopy, acute hypertension, cerebral arterioles, H511
Electrophysiology: see specific subject and site
End-diastolic volumes: see Volume
Endothelial cell, permeability, lipophilic solutes (frog), H597
Endotoxemia, pulmonary injury, prostaglandin production and, awake state, H348
Endotoxic shock: see Shock
Endotoxin
Escherichia coli, pressor effect, cerebellum, H368
 gram-negative effects, glucose uptake, skeletal muscle, H342
 insulinlike effect, skeletal muscle, H342
 insulinomimetic action, skeletal muscle, H342
 prostaglandin production, lung (sheep), H348
End systole, oxygen consumption, ventricular pressure-volume area, H320
Energy
 activation, lipophilic solute permeability (frog), H597
 potential, oxygen consumption, cardiac, H39
Enzymes: see Converting enzyme, and the specific enzyme
Epinephrine
 barium-induced contracture, cardiac muscle (mammal), H216
 contractility, vascular smooth muscle, H971
 isoproterenol effects, adrenoreceptor desensitization, H691
 pulmonary circulation effects, hypoxia, neonatal (lamb), H697
Erythrocytes
 amphiphilic effects, H229
 lipid peroxidation, H800
 unloading time, oxygen exchange, muscle, H199
 velocity, capillary transit times, muscle, H199
Evans's blue dye
 binding, arterial stretch effects, H645
 transport, arterial stretch effects, H645

Excitation-contraction coupling: see Coupling
Exercise
 collateral development and, cardiac, H811
 excitation-contraction coupling, myocardium, H472
 external mechanical work, oxygen consumption, cardiac, H39
 isometric, capsaicin injection, skeletal muscle, H315
 maximal, capillary transit times, oxygen exchange, muscle, H199
 racing, arterial baroreceptor reflexes (greyhound), H383
 reflex cardiovascular response, capsaicin injection, skeletal muscle, H315
 training, excitation-contraction coupling, myocardium, H472
 treadmill, blood volume and oxygen delivery, H177

F

Fasting
 coenzyme A synthesis regulation, heart, H606
 starvation, immunoreactive cathepsin D, heart, H222
Fatty acids, spontaneous hypertension, aortic, H33
Feeding, liquid-protein diet, copper deficiency, H185
Femoral circulation: see Circulation
Fetus
 hemorrhage, cardiovascular effects (lamb), H45
 prostaglandin D₂ effects, circulation (goat, lamb), H755
 renin-angiotensin system role, hemorrhage response (sheep), H848
 stress, cardiovascular effects (lamb), H45
 transcapillary pressure (Starling), H843
Fibrillation
 ventricular
 frontocortical-brain stem blockade, ischemic heart, H156
 intracellular recording, H465
Filter, arterial pressure, open-loop gain estimation, H832
Filtration, transcapillary, capacitance response, hepatic, H18
Flow
 aortic, maximal negative dP/dt, end of systole, H676
 myocardial, cardiac function and, collateral development, H811
 osmotic transcapillary heart, H448
 secondary driving forces, heart, H457
Flowmetry, ultrasonic, venous congestion, local, hand, H980
Flow response, passive, hyperemia, myocardial, H709
Fluid
 body, baroreceptor deafferentation, aortic, H685
 distribution, transcapillary, fetal, newborn, pregnant adult (Starling), H843
Force-velocity-length relations: see Muscle, heart
Forearm, blood flow, venous congestion, local, H980
Fourier analysis, high-frequency harmonics, cardiac relaxation, H669

Frank-Starling mechanism, systolic pressure-diameter relations, awake state, H354
Free oxygen radicals, acute hypertension, cerebral arterioles, H511

G

Ganglia
 cervical transmission, carotid sinus distension, H716
 reflex: see Reflexes
Gastric distension, reflexes, cardiovascular, H539
Glucocorticoids, antenatal, ductus arteriosus, preterm (infant and lamb), H430
Glucose
 calcium ion-tolerant myocytes, cardiac, H659
 plasma, hemorrhage effects (chicken), H9
 uptake, gram-negative endotoxin effects, skeletal muscle, H342
Glutathione peroxidase, platelets, H800
Glycogen, subcellular function, hypothermic ischemic myocardium, H336
Glycoside, thallium exchange, heart ventricle, H612
Gracilis muscle, vasoconstrictor cardiogenic chemoreflex, prostaglandin F_{2α}-induced, H528
Guanosine monophosphate, 3',5'-, neural sympathetic stimulation, H630
Guanylate cyclase, activation, cardiac relaxation, H441

H

Hand, arterial blood flow, venous congestion, local, H980
Harmonics, high-frequency, relaxation indices, cardiac, H669
Heart
 acetylcholine release, H431
 adenosine formation sites, H963
 afferent nerves, contrasting reflexes, coronary occlusion, H620
 aftercontractions, spontaneous hypertension, H927
 atrophy, starvation-induced, cathepsin D content, H222
 biopsy, rapid-freezing transmural drill, H126
 calcium ion-tolerant myocytes, exogenous substrate utilization, H659
 coenzyme A synthesis regulation, diabetes and fasting effects, H606
 cyclic nucleotides and norepinephrine, stimulation, H630
 denervation
 catecholamine stores after, H889
 sympathetic, autonomic nervous system and, H738
 dimensions, improved transducer, sonomicrometry, H664
 diseases, biopsy drill, H126
 dP/dt function, relaxation indices, H669
 efficiency, ventricular systolic pressure-volume area, H39
Electrophysiology
 coronary occlusion, contrasting reflex effects, H620

- developmental changes, H546
 sympathetic neural effects, H590
 thyroid hormone effects, cardiac Purkinje fibers, H934
 energetics, ventricular pressure-volume area, H320
 external work, ventricular pressure-volume area, H320
 failure
 baroreflex control, heart rate, H793
 congestive, sodium-potassium pump, H168
 irreversible, taurine effects, H238
 mechanical recovery, taurine effects, H238
 function, myocardial flow and, collateral development, H811
 immunoreactive cathepsin D, starvation-induced atrophy, H222
 impulse conduction, developmental changes, H546
 ischemic: *see also* Ischemia, heart copper deficiency, electrocardiography, H185
 psychological stress, ventricular fibrillation prevention, H156
 psychosocial risk factor, ventricular fibrillation prevention, H156
 sarcoplasmic integrity, taurine effects, H238
 sudden death, H156
 ventricular fibrillation prevention, H156
 isolated, isovolumetric properties, spontaneous hypertension, H927
 isovolumic, catecholamine stores, H889
 lysosomal enzymes, starvation, H222
 mechanics, ventricular pressure-volume area, H320
 muscle: *see* Muscle, heart
 neural control, H431
 oxygen consumption, ventricular systolic pressure-volume area, H39
 perfused, amphiphile effects, H229
 pressure-volume area, oxygen consumption regression, H320
 relaxation
 adenosine monophosphate, cyclic and, H441
 high-frequency harmonics, H669
 tissues, insulin effects, H636
 transcapillary osmotic flow, H448, H457
 ultrastructure, developmental changes, H546
 working
 diabetes effects, H375
 substrate effects, H391
- Heart atria
 contraction: *see* Muscle, heart, contractility
 receptors, Bainbridge reflex (baboon), H164
 recovery properties, sympathetic neural effects, rhythm, H590
- Heart cells: *see also* Muscle cells, heart; Cardiac cells
 ventricular, intracellular recording, fibrillation, H465
- Heart rate
 aortic nerve transection, H481
 Bainbridge reflex (baboon), H164
 baroreflex control abnormalities, heart failure, H793
 lung inflation effects, (seal), H190
 nervous control, tachycardia, H874
 sinoaortic reflexes, defense behaviors, H421
- systemic hypoxia effects, muscle microcirculation, H746
- Heart ventricles
 biopsy drill, H126
 compliance, ischemic arrest, H300
 continuous positive-pressure ventilation effects, pressure-volume relations, H821
 energetics, oxygen consumption, H39
 fibrillation
 frontocortical-brain stem blockade, ischemic heart, H156
 intracellular recording, H465
 function, stenosis, H80
 hyperexcitable periods, spontaneous hypertension, H927
 hypertrophy, renovascular hypertension, H408
 interaction, H87
 intrinsic rate, spontaneous hypertension, H927
 isovolumetric properties, spontaneous hypertension, H927
 mechanics, oxygen consumption, H39
 performance, subendocardium and subepicardium, H920
 pressure-volume area, oxygen consumption regression, H320
 relaxation, ischemic arrest, H300
 systolic pressure-volume area, oxygen consumption, H39
 systolic time, maximal negative dP/dt, H676
 thallium exchange
 glycoside effects, H612
 hyperkalemia effects, H612
- Heart ventricles, left
 compliance, H87
 contractility, smoke stimulation, H584
 diameter, subendocardium and subepicardium, H920
- dP/dt
 cyclic nucleotides and norepinephrine, H630
 maximal negative, end of systole, H676
 end-diastolic pressure, ischemic arrest and perfusion, H300
- function
 amphiphile effects, H229
 ischemia effects, awake state, H413
 geometry, transducer, sonomicrometry, H664
- mechanics
 subendocardium role, H920
 subepicardium role, H920
 performance, subendocardium and subepicardium, H920
- regional wall thickness, coronary occlusion, H293
- subendocardium, blood flow and high-energy phosphates, H804
- volume, subendocardium and subepicardium, H920
- volume measurement, radiopaque markers, H896
- wall thickness, subendocardium and subepicardium, H920
- Heart ventricles, right
 distension, H87
 hypertrophied
 coronary blood flow and (pony), H881
 monocrotaline intoxication effects, H149
- volume measurement, radiopaque markers, H896
- Hematocrit, capacitance responses, densitometry, hepatic, H18
- Hemodilution, oxygen delivery, exercise, H177
- Hemodynamics
 coronary, vasodilation, H767
 volume measurement, radiopaque markers, ventricular, H896
- Hemorrhage
 acute, cardiovascular effects, fetal (lamb), H45
 hematologic effects (chicken), H9
 quick mild, open-loop gain, H832
 renin-angiotensin role, fetal (sheep), H846
 vascular effects (chicken), H9

- Hyperemia
 myocardial, coronary artery pressure dependency, H709
 reactive, coronary artery vasodilation, H767
- Hyperkalemia, thallium exchange, heart ventricle, H612
- Hypertension
 acute, cerebral arteriolar abnormalities, H511
 aortic nerve transection, H481
 arterial stretch effects, transmural albumin and Evan's blue dye transport, H645
 hypertonic saline-induced, vasopressin, catecholamines and plasma volume, H827
 neurogenic, baroreceptor deafferentation, aortic, H685
 one-kidney, one-clip Goldblatt groups, venous capacity, H487
 pressor responses, vasopressin, H862
 pulmonary
 chronic hypoxia, age and sex influences, H62
 recovery, age and sex influences, H62
 renal, cardiac hypertrophy, therapy, H408
- renovascular
 indomethacin effects, H533
 sodium and angiotensin effects, H788
 salt loading, regional blood flow, H361
 spontaneous
 aortic phospholipid deacylation-reacylation cycle, H33
 cardiac hypertrophy, therapy, H408
 isovolumetric properties, heart ventricles, H927
 norepinephrine and tetrodotoxin, H837
- stenosis, renal artery, H2
- systemic arterial, myocardial ischemia and, H855
- venous capacity, H487

Hyperthyroidism, transmembrane potential, cardiac Purkinje fibers, H934
 Hypertonic solutions, saline-induced hypertension, vasopressin, catecholamines and plasma volume, H827
Hypertrophy
 cardiac, renovascular hypertension, therapy, H408
 coronary blood flow, right ventricular myocardium (pony), H881
 left ventricular, contractile function, H80
 myocardial
 isovolumetric properties, heart ventricles, H927
 RNA polymerase activity, muscle and nonmuscle cells, H901
 sodium-potassium pump, heart muscle, H168
Hypothermia
 excitatory-contraction coupling, ischemic myocardium, H336
 ischemic arrest, myocardial volume regulation, H116
 vascular responses to, skin and skeletal muscle, H868
Hypoxanthine, formation sites, heart, H963
Hypoxia
 adenosine formation sites, heart, H963
 blood flow, cerebral, H209
 carbon monoxide effects, blood flow, cerebral, H209
 chronic, pulmonary hypertension, age and sex influences, H62
 β -receptor reactivity, pulmonary vascular, neonatal (lamb), H697
 systemic
 carotid chemoreceptors and vagi, H874
 microcirculation, muscle, H746
 tachycardia, carotid chemoreceptors and vagi, H874

I

Impulse conduction: *see* Conduction
Indomethacin
 contractility, vascular smooth muscle, H971
 ductus arteriosus, preterm (infant and lamb), H430
 hypertension, renovascular, H533
Infarction
 myocardial
 calcium ion sensitivity, actomyosin, H704
 experimental, autonomic nervous system and, H738
 left ventricular wall thickness, regional, H293
 size reduction, autonomic nervous system and, H738
Innervation
 regional, heart, H590
 vasoconstrictor, femoral circulation (swine), H505
 vasodilator, femoral circulation (swine), H505
Inosine, formation sites, heart, H963
Inotropy, heart muscle: *see* Muscle, heart, contractility
Insulin, cardiac tissues, electrical activity, H636
Interstitial collagen, ischemic arrest, myocardial, H116
Interstitial free fluid pressure: *see* Pressure

Interstitial protein osmotic pressure: *see* Pressure
Intracellular recording, ventricular cells, fibrillation, H465
Intramitochondrial amorphous densities, substrate effects, ischemia, H391
Ions, transport, resting potential changes, heart muscle, H168
Ischemia
 arrest, myocardial protection from, H326
 coronary, resistance and transport increases, H262
 excitation-contraction coupling, hypothermic myocardium, H336
 heart
 copper deficiency, electrocardiography, H185
 structure, function and metabolism, substrate effects, H391
 taurine effects, H238
 ventricular fibrillation prevention, H156
 hypothermic, myocardial volume regulation, H116
 injury, autonomic nervous system and, H738
 left ventricular pressure, elevated after, H300
 myocardial
 electron transfer complex I (pig), H308
 heart ventricles, H87
 inner membrane enzyme defects, mitochondrial (pig), H308
 left ventricular function, awake state, H413
 regional function recovery after, H399
 systemic arterial hypertension effects, H855
 ventricular fibrillation prevention, H156
 vasodilation, coronary artery, H767
 ventricular tachyarrhythmias, reperfusion, H730
Isometric exercise: *see* Exercise
Isoproterenol
 injection, adrenoreceptor desensitization after, H691
 phospholipase activation, diabetes effects, myocardial, H375
 pulmonary circulation effects, hypoxia, neonatal (lamb), H697
 Isoproterenol hydrochloride, blood flow, myocardial (pony), H881
Isovolumetric properties, spontaneous hypertension, heart ventricles, H927

K

Kidney
 function curve, baroreceptor deafferentation, aortic, H685
 hypertension
 pressor responses, vasopressin, H862
 sodium and angiotensin effects, H788
 vascular effects, angiotensin I and II, H914
Kininase II, bradykinin potentiation, H255

L

Lactate, calcium-ion tolerant myocytes, cardiac, H659
Lagrangian strain, left ventricular regional function, H413
Landis technique, lipophilic solutes, capillary permeability (frog), H597

Length-tension relations, cardiac: *see* Muscle, heart
Lipids
 neutral, spontaneous hypertension, aortic, H33
 peroxidation, platelets, H800
Lipophilic solutes, permeability, capillaries (frog), H597
Lipoprotein, transmural transport, aortic (dog, human, pig), H54
Liver
 capacitance responses, blood flow and venous pressure, H18
 compliance, blood flow and venous pressure, H18
 filtration, blood flow and venous pressure, H18
 sinusoids, blood flow and venous pressure, H18
Loop
 closed experiment, arterial pressure control system, H832
 open, gain, arterial pressure control system, H832
Lumbar nerve, stimulation, femoral circulatory response (swine), H505
Lung
 adrenergic mechanisms, intralobar arteries and veins, H274
 cardiorespiratory interactions, (seal), H190
 inflation
 heart rate (seal), H190
 respiration (seal), H190
 vagal afferent activity (seal), H190
 lymph, endotoxemia, prostaglandin production (sheep), H348
 prostaglandin production, endotoxemia (sheep), H348
 structure and function, monocrotaline intoxication effects, H149
Lymph, lung, endotoxemia, prostaglandin production (sheep), H348
Lysophosphatidylcholine, erythrocytes, coronary arteries, perfused hearts and, H229
Lysosomal enzymes, starvation, heart, H222
Lysosomes, cathepsin D content, starvation, heart, H222

M

Malondialdehyde, lipid peroxidation, platelets, H800
Manganese, barium-induced contracture, cardiac muscle (mammal), H216
Mathematical models: *see* Models; *see also* specific subject and site
Membrane
 cell, permeability, ischemic arrest, H116
 potentials: *see* Potentials
 resistance: *see* Resistance
Mesenteric lymphatics, relaxation, transmural stimulation (bovine), H498
Metabolism: *see* specific subject and site
Metabolites, vasodilator, hyperemia, myocardial, H709
Metals, trace, copper deficiency, electrocardiography, H185
Micelles, coronary arteries, erythrocytes, perfused hearts and, H229
Microautoradiography, quantitative, protein transport, aortic (dog, human, pig), H54

- M**icrocirculation, muscle, systemic hypoxia, H746
Microelectrodes, intracellular techniques, ischemia, myocardial, H738
Microprefusion
 capillary, lipophilic solutes (frog), H597
 subendocardium, left ventricular, H804
Micropipette holder, motion compensated, intracellular recording, fibrillation, H465
Microspheres
 acute pericardial tamponade, H49
 adenosine and dipyridamole effects, cerebral blood flow, H775
 radioactive
 angiotensin I and II effects, intrarenal, H914
 blood flow, hypertension, H361
 collateral development effects, cardiac, H811
 vasa vasorum, aortic wall nourishment, H781
Mitochondria, function, potassium and verapamil cardioplegia, H326
Mitochondrial enzymes, inner membrane defects, myocardial ischemia (pig), H308
Models
 aortic valve behavior, H286
 baroreceptor output, respiratory maneuvers, H721
 computer, reentrant tachycardia stability, H947
 mathematical, transport function using multiple regression analysis, H133
 pressure dependency, coronary reactive hyperemia, H709
 prostaglandin D₂, perinatal circulation and, H755
 rapid-freezing transmural cardiac biopsy drill, H126
 transcapillary osmotic flow, heart, H448
 ultrasonic transducer, cardiac, H664
 ventricular cell fibrillation, action potential, H465
Monocrotaline, intoxication, pulmonary structure and function changes, H149
Monomers, coronary arteries, erythrocytes, perfused hearts and, H229
Morphology, quantitative, hypertension, age and sex influences, H62
Mueller maneuvers, baroreceptor output, H721
Muscarinic receptors: *see* Receptors
Muscle
 afferents, reflex response, cardiovascular, capsaicin injection, H315
 capillary transit times, oxygen exchange, H199
 microcirculation, systemic hypoxia, H746
 potassium-induced relaxation, vascular, H971
 striated, stimulus-response contractility, H971
 tension development, vascular, H971
Muscle, heart
 blood flow, sinoaortic reflexes, H421
 cellular injury, ischemia, autonomic nervous system and, H738
 coenzyme A synthesis, diabetes and fasting effects, H606
 contractile force, calcium and sodium effects, Purkinje fibers, H561
 contractility
 cigarette smoke effects, H584
 dysfunction, endotoxic shock, H954
 inotropic responsiveness, endotoxic shock, H954
 sarcolemmal calcium binding and, muscle preparations, H576
 contraction
 barium-induced mechanism (mammal), H216
 preload and systolic pressure-diameter relations, H354
 force-velocity-length relations, awake state, H354
 length-tension relations, developmental changes, H546
 papillary
 barium-induced contracture (mammal), H216
 exercise effects, excitation-contraction coupling, H472
 preparations, sarcolemmal calcium binding and contractility, H576
 relaxation, high-frequency harmonics, H669
 resting potential changes, sodium-potassium pump, H168
 strophanthidin inotropy, calcium and sodium effects, Purkinje fibers, H561
Muscle, skeletal
 blood flow, hypertension, H361
 glucose uptake, gram-negative endotoxin effects, H342
 reflex response, cardiovascular, capsaicin injection, H315
 vascular resistance, hemorrhage (chicken), H9
 vascular responses, hypothermia, H868
Muscle, smooth
 contractility, stimulus response, vascular, H971
 contraction, transmural stimulation, lymphatic (bovine), H498
 pulmonary vascular, receptors, H274
 relaxation, transmural stimulation, lymphatic (bovine), H498
 vascular, hypothermia effects, H868
Muscle cells, heart
 RNA polymerase activity, myocardial hypertrophy, H901
 transcription, myocardial hypertrophy, H901
Myocardial infarction, left ventricular wall thickness, regional, H293
Mycardium: *see also* Muscle, heart
 acute ischemia, systemic arterial hypertension effects, H855
 adaptation, exercise, H472
 adenosine monophosphate, cyclic-protein kinase cascade system, diabetes effects, H375
 atrial, contractile dysfunction, endotoxic shock, H954
 blood flow, mitochondrial enzyme defects, ischemia (pig), H308
 contraction: *see* Muscle, heart
 cyclic nucleotides and norepinephrine, neural sympathetic stimulation, H630
 depression, contractile dysfunction, endotoxic shock, H954
 exercise effects, excitation-contraction coupling, H472
 flow, cardiac function and, collateral development, H811
 geometry, ischemia effects, H413
 hypertrophy, blood flow, right ventricular (pony), H881
 hypothermic ischemia, excitation-contraction coupling, H336
 ischemic, regional function recovery, H399
 preservation, autonomic nervous system and, H738
 protection, ischemic arrest, H300, H326
 reactive hyperemia, coronary artery pressure, H709
 regional function, coronary occlusion, H293, H399
 regional perfusion, coronary artery vasodilation, H767
 relaxation, heart ventricles, H87
 stiffness, ischemia effects, H413
 subcellular function, ischemia, hypothermia and, H336
 thallium exchange, hyperkalemia and glycoside effects, H612
 volume regulation
 hypothermic ischemic arrest, H116
 normothermic ischemic arrest, H116
Myocytes, cardiac: *see* Cardiac cells; Muscle cells, heart
Myofibrils, subcellular function, hypothermic ischemic myocardium, H336
Myogenic response, hyperemia, myocardial, H709

N

- NADH-CoQ-reductase, mitochondrial enzyme defects, myocardial ischemia (pig), H308
Naloxone, endotoxin shock, cerebellum pressor effects, H368
Necrosis
 endothelial, acute hypertension, cerebral arterioles, H511
 medial, vasa vasorum role, aortic wall nourishment, H781
Neonate, β -adrenergic receptors, hypoxic pulmonary circulation (lamb), H697
Nerves: *see* specific nerve and site
Neural control
 circulation, coronary occlusion, H620
 mechanisms, racing (greyhound), H383
Neural stimulation, sympathetic, cardiac cyclic nucleotides and norepinephrine, H630
Neurogenic relaxation, transmural stimulation, lymphatics, H498
Neurotransmission, adrenergic, intralobar pulmonary arteries and veins, H274
Newborn
 prostaglandin D₂ effects, circulation (goat, lamb), H755
 transcapillary pressure (Starling), H843
Nifedipine, coronary vasoconstriction, H493
Nitroglycerin, coronary artery diameter, measurement, H73
Nitroprusside, acute pericardial tamponade, H49
Nociceptor, cardiac, contractility and smoke, H584
Nonadrenergic innervation, inhibitory, relaxation, mesenteric lymphatics, H498
Noradrenergic mechanisms, aortic nerve transection, brain and peripheral organs, H481
Norepinephrine
 cardiac cyclic nucleotides and, neural sympathetic stimulation, H630

Norepinephrine (continued)
 carotid sinus baroreceptor stimulation, H650
 contractility, vascular smooth muscle, H971
 extraneuronal reuptake, pulmonary vascular smooth muscle, H274
 neuronal uptake, pulmonary vascular smooth muscle, H274
 pulmonary circulation effects, hypoxia, neonatal (lamb), H697
 strophanthidin inotropy, Purkinje fibers, H561
 tissue, aortic nerve transection, H481
 turnover, aortic nerve transection, H481
 venous membrane potential response, spontaneous hypertension, H837
5'-Nucleotidase, adenosine formation, heart, H963
Nucleotides, cyclic, cardiac, norepinephrine and, neural sympathetic stimulation, H630

O

Open-loop gain, arterial pressure control system, H832
Osmolality, plasma, hemorrhage effects (chicken), H9
Osmotic buffering, transcapillary, secondary driving forces, heart, H457
Osmotic flow: *see* Flow
Osmotic pressure: *see* Pressure
Osmotic reflection coefficient, capillaries (frog), H597
Osmotic transient
 transcapillary heart, H448
 secondary driving forces, heart, H457
Ouabain
 cAMP levels, heart, H441
 contractility, vascular smooth muscle, H971
Overdrive, sodium-potassium pump, heart muscle, H168
Oxidative phosphorylation, potassium and verapamil cardioplegia, ischemic arrest, H326
Oxygen
 arterial content changes, cerebral blood flow (lamb), H209
 consumption
 blood flow, cerebral, H209
 blood volume changes, exercise, H177
 cardiac, ventricular systolic pressure-volume area, H39
 ventricular pressure-volume area, cardiac, H320
 cost, ventricular pressure-volume area, H320
 delivery
 blood flow, cerebral, H209
 blood volume changes during exercise, H177
 diffusion, capillary transit times, muscle, H199
 diffusion fields, spinal cord, H761
 exchange, capillary transit times, muscle, H199
 gradients, capillary transit times, muscle, H199
 microelectrodes, spinal cord, H761
 shunt, capillary transit times, muscle, H199

tension
 spinal cord, H761
 systemic hypoxia, muscle microcirculation, H746
Oxygenation, blood volume changes, exercise, H177

P

pA₂, pulmonary vascular smooth muscle, H274
Palmitate
 calcium-ion tolerant myocytes, cardiac, H659
 structure, function and metabolism correlates, ischemic heart, H391
Pantothenate kinase, diabetes and fasting effects, heart, H606
Pantothenic acid, diabetes and fasting effects, heart, H606
Papillary muscle: *see* Muscle, heart
Parasympathetic nervous system, acetylcholine release, neural control, heart, H431
Partition coefficient, capillaries (frog), H597
Peptides, vasoactive, angiotensin I and II, intrarenal vascular effects, H914
Pericardium, acute tamponade, volume and vasodilator effects, H49
Peripheral resistance: *see* Resistance
Peritoneum, intraperitoneal distension, reflexes, cardiovascular, H539
Permeability
 antipyrine and aminopyrine, capillaries (frog), H597
 cell membrane, ischemic arrest, H116
 coronary, resistance and transport increases, obstruction, H262
pH, tissue, systemic hypoxia, muscle microcirculation, H746
Pharmacology: *see* specific subject and site
Phenoxybenzamine
 hemorrhage effects (chicken), H9
 pulmonary circulation effects, hypoxia, neonatal (lamb), H697
Phenylephrine, arterial hypertension, myocardial ischemia, H855
Phosphates, high energy, blood flow and, subendocardium, left ventricular, H804
Phosphatidylcholine, spontaneous hypertension, aortic, H33
Phospholipase, spontaneous hypertension, aortic, H33
Phospholipids, aortic, deacylation-reacylation cycle, spontaneous hypertension, H33
4'-Phosphopanthetheine, diabetes and fasting effects, heart, H606
Phosphorylase, activation, isoproterenol-induced, diabetes effects, myocardial, H375
Phosphorylation, oxidative: *see* Oxidative phosphorylation
Plasma
 constituents: *see* specific constituent electrolytes: *see* Electrolytes
 osmolality: *see* Osmolality
 volume: *see* Volume
Platelets
 accumulation and release (pig), H99
 interfacial concentration, release (pig), H99
 lipid peroxidation, H800
 mass transport (pig), H99

Postganglionic action potentials: *see* Potentials
Postganglionic sympathetic nerve: *see* Sympathetic nerve
Potassium
 cardioplegia, ischemic arrest, H326
 contractility, vascular smooth muscle, H971
Potential energy, ventricular pressure-volume area, H326
Potentials
 action
 exercise effects, excitation-contraction coupling, myocardium, H472
 fibrillation, ventricular cells, H465
 thyroid hormones and Purkinje fibers, cardiac, H934
 membrane
 barium-induced contracture, cardiac muscle (mammal), H216
 insulin effects, cardiac, H636
 postganglionic action, carotid sinus distension and, H716
 resting, sodium-potassium pump, heart muscle, H168
transmembrane
 cellular injury, ischemia, myocardial, H738
 norepinephrine and tetrodotoxin, spontaneous hypertension, H837
 thyroid hormone effects, cardiac Purkinje fibers, H934
 venous membrane, norepinephrine and tetrodotoxin, spontaneous hypertension, H837
Practolol, injection, adrenoreceptor desensitization after, H691
Pregnancy: *see also* Fetus
 angiotensin II pressor response, volume expansion effects (ewe), H908
 transcapillary pressure (Starling), H843
Preload, changes, systolic pressure-diameter relations, awake state, H354
Pressor effect, endotoxin shock, cerebellum, H368
Pressor hyperresponsiveness: *see* Pressor response
Pressor response
 carotid, inhibition by left aortic depressor nerve, H555
 hyperresponsiveness, vasopressin, renal artery stenosis, H862
 stenosis, renal artery, H2
 vasopressin, renal artery stenosis, H862
 volume expansion effects, angiotensin II, pregnancy (ewe), H908
Pressure
 arterial
 endotoxic shock, H368
 sinoaortic reflexes, defense behaviors, H421
 arterial control system, open-loop gain estimation, H832
 capillary, fetal, newborn, adult, pregnant adult (Starling), H843
 coronary artery, hyperemia, myocardial, H709
 diastolic, myocardial ischemia, H855
 end-diastolic, left ventricular, ischemic arrest, H300
 interstitial fluid, transcapillary, fetal, newborn, pregnant adult (Starling), H843
 interstitial protein osmotic, transcapillary, fetal, newborn,

- pregnant adult (Starling), H843
 mean arterial, open-loop gain estimation, H832
 mean circulatory filling, hypertension, H487
 measurements, age and sex influences, H62
 overload, sodium-potassium pump, heart muscle, H168
 plasma protein osmotic, transcapillary, fetal, newborn, pregnant adult (Starling), H843
 threshold, carotid sinus baroreceptors, norepinephrine, H650
 transcapillary, fetal, newborn, adult and pregnant adult (Starling), H843
 transmural end-diastolic, continuous positive-pressure ventilation and, ventricular, H821
 venous, hepatic capacitance responses, H18
- Pressure-volume area**
 ventricular, oxygen consumption regression, cardiac, H320
 ventricular systolic, oxygen consumption, cardiac, H39
- Pressure-volume diagram**, oxygen consumption, cardiac, H39, H320
- Pressure-volume loop**, oxygen consumption, cardiac, H320
- Pressure-volume relations**, continuous positive-pressure ventilation effects, ventricular, H821

 stenosis, renal artery, H2
 volume expansion effects, pregnancy
 (ewe), H908
 release, hypertension, renovascular,
 H533
 secretion, hypertension, renovascular,
 H533
- Renin-angiotensin system**
 hemorrhage response, fetal (sheep),
 H848
 stenosis, renal artery, H2
- Reperfusion**
 coronary occlusion, myocardium, H399
 intracellular recording, ventricular
 fibrillation, H465
 left ventricular pressure, elevated after,
 H300
 ventricular tachyarrhythmias, anoxia
 effects, H730
- Repolarization**, atrial, sympathetic
 stimulation and, H590
- Resistance**
 coronary
 amphiphile effects, H229
 increase, obstruction, H262
 membrane, insulin effects, cardiac, H636
 peripheral
 regional sympathetic outflows, H109
 total, hemorrhage (chicken), H9
 pulmonary, hypoxia, neonatal (lamb),
 H697
- pulmonary vascular**, prostaglandin D₂
 effects, H755
- vascular**
 capacitance and, hypothermia, skin
 and skeletal muscle, H868
 hemorrhage, skeletal muscle (chicken),
 H9
 peripheral, hypoxic tachycardia, H874
- Respiration**
 lung inflation effects, (seal), H190
 maneuvers, baroreceptor output during,
 H721
- Respiratory stimulation**, upper, cigarette
 smoke, cardiac contractility, H584
- Rhythm**, cardiac, sympathetic neural
 effects, atrial recovery, H590
- RNA polymerase activity**, myocardial
 hypertrophy, muscle and nonmuscle
 cell, H901
- S**
- Saline**, hypertonic hypertension,
 vasopressin, catecholamines and
- Salt**
 balance, baroreceptor deafferentation,
 aortic, H685
 loading, hypertension, blood flow, H361
- Saralasin**
 bradykinin potentiation, H255
 renin-angiotensin system role,
 hemorrhage, fetal (sheep), H848
- Sarcolemmal calcium binding**: *see Calcium*
- Sarcoplasmic reticulum**, subcellular
 function, hypothermic ischemic
 myocardium, H336
- Selenium**, platelets, H800
- Septic shock**: *see Shock*
- Serotonin**, vasoconstrictor cardiogenic
 chemoreflex, H528
- Sex differences**, pulmonary hypertension,
 chronic hypoxia, H62
- Shock**
 endotoxic
 contractile dysfunction, heart, H954
 glucose uptake, skeletal muscle, H342
 pressor effect, cerebellum, H368
 septic, glucose uptake, skeletal muscle,
 H342
- Sinoaortic denervation**: *see Denervation*
- Sinoaortic reflexes**: *see Reflexes*
- Sinus node**, artery perfusion, heart failure,
 H793
- Sinusoids**, blood flow and venous pressure,
 hepatic, H18
- Skeletal muscle**: *see Muscle, skeletal*
- Skin**, vascular responses, hypothermia,
 H868
- Smoke**, cigarette, cardiac contractility
 during, H584
- Sodium**
 contractility, vascular smooth muscle,
 H971
 depletion, hypertension, renovascular,
 H533, H788
 hypertension, renovascular, H788
 hypertonic load, vasopressin,
 catecholamines and plasma volume,
 H827
 strophantidin inotropy, Purkinje fibers,
 cardiac, H561
- Sodium-potassium ATPase**
 contractility, vascular smooth muscle,
 H971
 resting potential changes, heart muscle,
 H168
- Sodium-potassium pump**: *see Pump*
- Sodium pump**: *see Pump*
- Solution**, high-calcium, strophanthidin
 inotropy, Purkinje fibers, H561
- Sonomicrometry**
 cardiac dimensions, transducer, H664
 pulse-transit, transducer, H664
- Species differences**
 aortic transmural protein transport, (dog,
 human, pig), H54
 glucocorticoid effects, ductus arteriosus,
 preterm (infant and lamb), H430
 sarcolemmal calcium binding,
 contractility and, cardiac (rat,
 rabbit, frog), H576
- Spinal cord**, oxygen fields, H761
- Splanchnic circulation**, regional
 sympathetic outflows, H109
- Splenectomy**, blood volume and oxygen
 delivery, exercise, H177
- Starvation**: *see Fasting*
- Stenosis**
 aortic, contractile function, experimental,
 H80
 coronary, collateral development effects,
 H811
 renal artery
 cardiovascular changes, H2
 vasopressin, H862
- Stimulation**
 carotid sinus baroreceptors,
 norepinephrine, H650
 sympathetic, atrial repolarization and,
 H590
 transmural, mesenteric lymphatic
 relaxation (bovine), H498
- Stomach**: *see also Gastric*
 distension, reflexes, cardiovascular, H539
- Stress**, immobilization, adrenoreceptor
 desensitization after, H691
- Stroke volume**, hemorrhage effects
 (chicken), H9
- Strophanthidin**, inotropy, calcium and
 sodium effects, cardiac, H561
- Subcellular function**: *see specific subject*
 and site
- Subendocardium**
 blood flow and high-energy phosphates,
 left ventricular, H804
 left ventricular mechanics, H920
- Substrate**
 exogenous, calcium ion-tolerant
 myocytes, heart, H569
 structure, function and metabolism
 correlates, ischemic heart, H391
- Subepicardium**, left ventricular mechanics,
 H920
- Sweat glands**, congenital absence,
 cutaneous vasodilation, H571
- Sympactectomy**, cardiac, catecholamine
 stores after, H889
- Sympathetic constrictor tone**,
 norepinephrine and tetrodotoxin,
 spontaneous hypertension, H837
- Sympathetic effects**, centrogenic
 pulmonary pathology, H109
- Sympathetic nerves**
 afferent: *see Afferent nerves*
 atrial recovery properties, cardiac
 rhythm, H590
 hypothermia, skin and skeletal muscle,
 H868
 postganglionic, relaxation, transmural
 stimulation, H498
- Sympathetic outflows**, centrogenic
 pulmonary pathology, H109
- Systole**, end, maximal negative dP/dt,
 H676
- Systolic pressure-diameter**, preload
 changes, awake state, H354
- T
- Tachyarrhythmias**, ventricular, anoxia
 effects, H730
- Tachycardia**
 atrioventricular re-entrant, stability of,
 H947
 hypoxic and cyanide-induced, carotid
 chemoreceptors and vagi, H874
 vagal, catecholamine stores, H889
- Tamponade**
 acute pericardial
 vasodilator effects, H49
 volume expansion effects, H49
- Taurine**, calcium paradox and ischemic
 heart failure, H238

Temperature, hydraulic conductivity, single capillaries, H29
 Temperature, body, regulation, sweat gland absence, H571
 Tension, muscular: *see Muscle*
 Tetrodotoxin
 strophanthidin inotropy, Purkinje fibers, H561
 venous membrane potential response, spontaneous hypertension, H837
 ventricular fibrillation, intracellular recording, heart cells, H455
 Thallium
 efflux, hyperkalemia and glycoside effects, heart ventricles, H612
 exchange
 glycoside effects, heart ventricle, H612
 hyperkalemia effects, heart ventricle, H612
 influx, hyperkalemia and glycoside effects, heart ventricles, H612
 uptake, hyperkalemia and glycoside effects, heart ventricles, H612
 Thermoosmosis, hydraulic conductivity, single capillaries, H29
 Thoracic aorta: *see Aorta*
 Threshold pressure: *see Pressure*
 Thrombosis, platelet accumulation and release (pig), H99
 Thromboxane A₂, carbocyclic, coronary vasoconstriction, H493
 Thyroid hormone, transmembrane potential and, Purkinje fiber, cardiac, H934
 Thyrotoxicosis, transmembrane potential, cardiac Purkinje fibers, H934
 T index, high-frequency harmonics, cardiac relaxation, H669
 Tissue
 cardiac
 insulin effects, H636
 stretch-depressed, insulin effects, H636
 norepinephrine, aortic nerve transection, H481
 oxygenation, blood volume changes during exercise, H177
 oxygen tension, spinal cord, H761
 pH, systemic hypoxia, muscle microcirculation, H746
 pressure, transcapillary osmotic flow, heart, H457
 Trace elements: *see specific subject and site*
 Trace metals: *see Metals*
 Training: *see Exercise*
 Transcapillary exchange
 lipophilic solutes (frog), H597
 muscle, H199
 Transcapillary filtration: *see Filtration*
 Transcapillary osmotic flow: *see Flow*
 Transcapillary pressure: *see Pressure*
 Transducers
 cardiac dimensions, sonomicrometry, H664
 ultrasonic, heart dimension, sonomicrometry, H664
 ultrasonic-dimension, left ventricular regional function, ischemia effects, H413
 Transmembrane potential: *see Potentials*

Transmural ventricular end-diastolic pressures: *see Pressure*
 Transport: *see specific subject and site*
 Tranlycypromine, angiotensin-induced relaxation, renal and cerebral arteries, H247
 Troponin, loss, actomyosin, coronary occlusion, H704
 Tryamine, catecholamine stores, cardiac, H889
 U
 Ultrasonic transit time, coronary artery diameter, measurement, H73
 Uncoupling, exercise effects, myocardium, H472
 V
 Vagal afferents
 activity, lung inflation effects (seal), H190
 contrasting reflex effects, coronary occlusion, H620
 Vagal cold block, left aortic depressor nerve, H555
 Vagus nerve
 Bainbridge reflex (baboon), H164
 tachycardia, hypoxic and cyanide-induced, H874
 Vasa vasorum, nourishment, aortic wall, H781
 Vascular hyperresponsiveness, vasopressin, renal artery stenosis, H862
 Vascular reactivity, depression, hyperemia, myocardial, H709
 Vascular reserve, coronary artery vasodilation, H767
 Vascular resistance: *see Resistance*
 Vasoconstriction
 coronary, carbocyclic thromboxane A₂-induced, H493
 hypothermia and, skin and skeletal muscle, H868
 Vasoconstrictor
 cardiogenic chemoreflex, prostaglandin F_{2α}-induced, H528
 innervation: *see Innervation*
 Vasodilation
 arteriolar, acute hypertension, cerebral, H511
 coronary, muscarinic receptor activation, H941
 coronary artery, pharmacologic- vs. ischemia-induced, H767
 cutaneous, absence of sweat glands, H571
 hypothermia and, skin and skeletal muscle, H868
 Vasodilator
 acute pericardial tamponade, H49
 innervation: *see Innervation*
 metabolites: *see Metabolites*
 Vasomotor reaction, regional sympathetic outflows, H109
 Vasopressin
 antagonists, hypertonic saline-induced hypertension, H827
 hypertension, hypertonic saline-induced, H827
 pressor response to, renal artery stenosis, H862
 Vasopressor hormones, hypothermia, skin and skeletal muscle, H868
 Vasospasm, coronary vasoconstriction, H493
 Venoarteriolar response, capacitance, hepatic, H18
 Venoconstriction, capacitance response, hepatic, H18
 Venous capacity, decreased, hypertension, H487
 Venous compliance: *see Compliance*
 Venous congestion, local, arterial blood flow, hand, H980
 Venous distension, local, arterial blood flow, hand, H980
 Venous membrane potential: *see Potentials*
 Venous pressure: *see Pressure*
 Ventilation
 continuous positive-pressure, ventricular pressure-volume relations and, H821
 controlled, hypoxia, carotid chemoreceptors and vagi, H874
 Ventricles: *see Heart ventricles*
 Verapamil
 cardioplegia, ischemic arrest, H326
 coronary vasoconstriction, H493
 reentrant tachycardia, stability, H947
 tachyarrhythmias, ventricular, anoxia and, H730
 ventricular fibrillation, intracellular recording, heart cells, H465
 Visceral reflexes: *see Reflexes*
 Volume
 end-diastolic, continuous positive pressure ventilation and, ventricular, H821
 left ventricular, subendocardium and subepicardium, H920
 measurement, radiopaque markers, ventricular, H896
 noninvasive measurement, radiopaque markers, ventricular, H896
 plasma, hypertonic saline-induced hypertension, H827
 Volume expansion
 acute pericardial tamponade, H49
 angiotensin II pressor response and nonpregnant (ewe), H908
 pregnancy (ewe), H908
 Volume loading, systolic pressure-diameter relations, awake state, H354
 Volume regulation
 mechanical performance, myocardial, after ischemic arrest, H116
 myocardial
 hypothermic ischemic arrest, H116
 normothermic ischemic arrest, H116
 W
 Water, balance, baroreceptor deafferentation, aortic, H685
 Waves, digitalized, relaxation indices, cardiac, H669
 Work
 cardiac: *see Heart*
 external mechanical: *see Exercise*

No. 1. JANUARY 1981

EDITORIAL

H1

Cardiovascular changes within 24 h after renal artery stenosis in rabbits <i>S. Siripaisarnpipat, J. A. Johnson, K. D. Kurz, W. L. Fowler, Jr., and C. G. Payne</i>	H2
Vascular and hematologic effects of hemorrhage in the chicken <i>J. M. Ploucha, J. B. Scott, and R. K. Ringer</i>	H9
Hepatic capacitance responses to changes in flow and hepatic venous pressure in dogs <i>T. D. Bennett and C. F. Rothe</i>	H18
Effects of temperature on hydraulic conductivity of single capillaries <i>F. E. Curry</i>	H29
Aortic phospholipid deacylation-reacylation cycle in spontaneously hypertensive rats <i>C. Limas, P. Goldman, and C. J. Limas</i>	H33
Ventricular systolic pressure-volume area as predictor of cardiac oxygen consumption <i>H. Suga, T. Hayashi, and M. Shirahata</i>	H39
Cardiovascular effects of acute hemorrhage in fetal lambs <i>P. L. Toubas, N. H. Silverman, M. A. Heymann, and A. M. Rudolph</i>	H45
Effects of volume expansion and vasodilators in acute pericardial tamponade <i>J. A. Gascho, J. B. Martins, M. L. Marcus, and R. E. Kerber</i>	H49
Aortic transmural serum protein transport: effect of concentration, time, and location <i>D. L. Fry, R. W. Mahley, S. Y. Oh, and C. R. Swyt</i>	H54
Age and sex influence on pulmonary hypertension of chronic hypoxia and on recovery <i>M. Rabinovitch, W. J. Gamble, O. S. Miettinen, and L. Reid</i>	H62
Continuous measurement of coronary artery diameter in situ <i>H. Tomoike, H. Ootsubo, K. Sakai, Y. Kikuchi, and M. Nakamura</i>	H73
Contractile function in chronic gradually developing subcoronary aortic stenosis <i>B. A. Carabello, R. Mee, J. J. Collins, Jr., R. A. Kloner, D. Levin, and W. Grossman</i>	H80
Right ventricular distension and left ventricular compliance <i>B. H. Lorell, I. Palacios, W. M. Daggett, M. L. Jacobs, B. N. Fowler, and J. B. Newell</i>	H87
Platelet adhesion and release: interfacial concentration of released materials <i>G. A. Adams and I. A. Feuerstein</i>	H99
Participation of regional sympathetic outflows in the centrogenic pulmonary pathology <i>H. I. Chen, J. D. Lin, and J. F. Liao</i>	H109
Myocardial volume regulation after normothermic and hypothermic ischemic arrest in dogs <i>M. B. Pine, O. H. L. Bing, R. M. Weintraub, and W. H. Abelmann</i>	H116

SPECIAL COMMUNICATIONS

Rapid-freezing transmural cardiac biopsy drill <i>J. R. Allard, R. L. Conhaim, G. J. Vlahakes, M. J. O'Neill, and J. I. E. Hoffman</i>	H126
Computation of transport function using multiple regression analysis <i>M. Nakai</i>	H133

LETTERS TO THE EDITOR

H145

ANNOUNCEMENTS

H148

No. 2. FEBRUARY 1981

Changes in pulmonary structure and function induced by monocrotaline intoxication <i>F. Ghodsi and J. A. Will</i>	H149
Blockade of frontocortical-brain stem pathway prevents ventricular fibrillation of ischemic heart <i>J. E. Skinner and J. C. Reed</i>	H156
Bainbridge reflex in conscious, unrestrained, and tranquilized baboons <i>S. F. Vatner and M. Zimpfer</i>	H164
Resting potential changes associated with Na-K pump in failing heart muscle <i>S. R. Houser, A. R. Freeman, J. M. Jaeger, E. A. Breisch, R. L. Coulson, R. Carey, and J. F. Spann</i>	H168
Effects of small changes of blood volume on oxygen delivery and tissue oxygenation <i>I. H. Sarelius and J. D. Sinclair</i>	H177
Abnormal electrocardiograms in rats deficient in copper <i>L. M. Klevay and K. E. Viestenz</i>	H185
Lung inflation: effects on heart rate, respiration, and vagal afferent activity in seals <i>J. E. Angell-James, R. Elsner, and M. De Burgh Daly</i>	H190
Calculated dispersion of capillary transit times: significance for oxygen exchange <i>C. R. Honig and C. L. Odoroff</i>	H199
Effects of changes in arterial O ₂ content on cerebral blood flow in the lamb <i>M. D. Jones, Jr., R. J. Traystman, M. A. Simmons, and R. A. Molteni</i>	H209
Excitation-contraction coupling in mammalian cardiac muscle during Ba ²⁺ -induced contracture <i>Y. Saeki, T. Shibata, and K. Shiozawa</i>	H216
Rabbit cardiac immunoreactive cathepsin D content during starvation-induced atrophy <i>A. M. Samarel, E. A. Ogunro, A. G. Ferguson, P. Allenby, and M. Lesch</i>	H222
Effects of amphiphiles on erythrocytes, coronary arteries, and perfused hearts <i>S. R. Bergmann, T. B. Ferguson, Jr., and B. E. Sobel</i>	H229
Effect of taurine on calcium paradox and ischemic heart failure <i>J. H. Kramer, J. P. Chovanc, and S. W. Schaffer</i>	H238
Angiotensin-induced relaxation in isolated dog renal and cerebral arteries <i>N. Toda and M. Miyazaki</i>	H247
Evidence for bradykinin potentiation by angiotensin congeners in conscious rats <i>S. C. Textor, H. Brunner, and H. Gavras</i>	H255
Concurrent increases in resistance and transport after coronary obstruction in dogs <i>T. R. Harris, K. A. Overholser, and R. G. Stiles</i>	H262
Adrenergic mechanisms in canine intralobar pulmonary arteries and veins <i>S. Greenberg, P. J. Kadowitz, A. Hyman, and F. A. Curro</i>	H274
In vivo cinematographic analysis of behavior of the aortic valve <i>A. A. Van Steenhoven, C. W. J. Verlaan, P. C. Veenstra, and R. S. Reneman</i>	H286
Regional left ventricular wall thickness early and late after coronary occlusion in the conscious dog <i>S. Sasayama, K. P. Gallagher, W. S. Kemper, D. Franklin, and J. Ross, Jr.</i>	H293
Mechanism of elevated left ventricular end-diastolic pressure after ischemic arrest and reperfusion <i>H. V. Schaff, V. L. Gott, R. A. Goldman, J. V. Frederiksen, and J. T. Flaherty</i>	H300
Mitochondrial inner membrane enzyme defects in porcine myocardial ischemia <i>W. Rouslin and R. W. Millard</i>	H308
<hr/> ANNOUNCEMENTS	H314

No. 3. MARCH 1981

Reflex cardiovascular response during injection of capsaicin into skeletal muscle <i>S. C. Crayton, J. H. Mitchell, and F. C. Payne III</i>	H315
--	------

Regression of cardiac oxygen consumption on ventricular pressure-volume area in dog <i>H. Suga, T. Hayashi, M. Shirahata, S. Suehiro, and R. Hisano</i>	H320
Myocardial protection from ischemic arrest: potassium and verapamil cardioplegia <i>W. W. Pinsky, R. M. Lewis, J. B. McMillin-Wood, H. Hara, C. J. Hartley, P. C. Gillette, and M. L. Entman</i>	H326
Excitation-contraction coupling in hypothermic ischemic myocardium <i>M. L. Hess, S. M. Krause, A. D. Robbins, and L. J. Greenfield</i>	H336
Direct effects of gram-negative endotoxin on skeletal muscle glucose uptake <i>R. M. Raymond, J. M. Harkema, and T. E. Emerson, Jr.</i>	H342
Pulmonary injury and prostaglandin production during endotoxemia in conscious sheep <i>R. H. Demling, M. Smith, R. Gunther, J. T. Flynn, and M. H. Gee</i>	H348
Preload changes modify systolic pressure-diameter relations in the conscious dog <i>B. Crozatier, D. Caillet, C. Thuillez, J.-L. Chevrier, P. Peronneau, and P.-Y. Hatt</i>	H354
Regional blood flows in salt loading hypertension in the dog <i>J. F. Liard</i>	H361
An observed pressor effect of the cerebellum during endotoxin shock in the dog <i>H. F. Janssen, L. O. Lutherer, and C. D. Barnes</i>	H368
Diabetes alters the myocardial cAMP-protein kinase cascade system <i>W. R. Ingebretsen, Jr., C. Peralta, M. Monsher, L. K. Wagner, and C. G. Ingebretsen</i>	H375
Arterial baroreceptor reflexes in young and old racing greyhounds <i>R. H. Cox, R. J. Bagshaw, and D. K. Detweiler</i>	H383
Structural, functional, and metabolic correlates in ischemic hearts: effects of substrates <i>D. Feuvray</i>	H391
Time course of regional function after coronary occlusions of 1- to 120-min duration <i>J. R. Darsee, R. A. Klener, and E. Braunwald</i>	H399
Reversal of cardiac hypertrophy in renal hypertensive rats: medical vs. surgical therapy <i>S. Sen, R. C. Tarazi, and F. M. Bumpus</i>	H408
Effects of ischemia on left ventricular regional function in the conscious dog <i>C. H. Edwards II, J. S. Rankin, P. A. McHale, D. Ling, and R. W. Anderson</i>	H413
Role of sinoaortic reflexes in hemodynamic patterns of natural defense behaviors in the cat <i>G. Baccelli, R. Albertini, A. Del Bo, G. Mancia, and A. Zanchetti</i>	H421

ANNOUNCEMENTS

H430

No. 4. APRIL 1981

REVIEW: NEURAL CONTROL OF THE HEART

Release of acetylcholine in the isolated heart <i>K. Löffelholz</i>	H431
Relaxing effect of pharmacologic interventions increasing cAMP in rat heart <i>L. Vittone, A. Grassi, L. Chiappe, M. Argel, and H. E. Cingolani</i>	H441
Transcapillary osmotic flows in the in vitro perfused heart <i>F. F. Vargas and G. L. Blackshear</i>	H448
Secondary driving forces affecting transcapillary osmotic flows in perfused heart <i>F. F. Vargas and G. L. Blackshear</i>	H457
Intracellular recording of in situ ventricular cells during ventricular fibrillation <i>T. Akiyama</i>	H465

Influence of exercise on excitation-contraction coupling in rat myocardium <i>G. F. Tibbits, R. J. Barnard, K. M. Baldwin, N. Cugaj, and N. K. Roberts</i>	H472
Noradrenergic mechanisms in brain and peripheral organs after aortic nerve transection <i>K. P. Patel, J. Ciriello, and R. L. Kline</i>	H481
Decreased total venous capacity in Goldblatt hypertensive rats <i>J. Yamamoto, N. C. Trippodo, A. A. MacPhee, and E. D. Frohlich</i>	H487
Mechanism of coronary vasoconstriction induced by carbocyclic thromboxane A ₂ <i>E. F. Smith III, A. M. Lefer, and K. C. Nicolaou</i>	H493
Relaxation of bovine mesenteric lymphatics in response to transmural stimulation <i>T. Ohhashi and I. C. Roddie</i>	H498
Femoral circulatory responses to lumbar nerve stimulation in developing swine <i>N. M. Buckley, P. Brazeau, I. D. Frasier, and P. M. Gootman</i>	H505
Mechanism of cerebral arteriolar abnormalities after acute hypertension <i>H. A. Kontos, E. P. Wei, W. D. Dietrich, R. M. Navari, J. T. Povlishock, N. R. Ghatak, E. F. Ellis, and J. L. Patterson, Jr.</i>	H511
A vasoconstrictor cardiogenic chemoreflex induced by prostaglandin F _{2α} <i>R. E. Parker and J. W. Strandhoy</i>	H528
Effects of indomethacin in dogs with acute and chronic renovascular hypertension <i>J. R. Dietz, J. O. Davis, J. M. DeForrest, R. H. Freeman, S. F. Echtenkamp, and A. A. Seymour</i>	H533
Cardiovascular reflexes elicited by passive gastric distension in anesthetized cats <i>J. C. Longhurst, H. L. Spilker, and G. A. Ordway</i>	H539
Developmental changes in impulse conduction in the canine heart <i>M. R. Rosen, M. J. Legato, and R. M. Weiss</i>	H546
Inhibition of carotid pressor response by left aortic depressor nerve in dogs <i>S. C. Walgenbach, D. E. Donald, and A. Melcher</i>	H555
Role of calcium and sodium in strophanthidin inotropy in cardiac Purkinje fibers <i>M. L. Bhattacharyya and M. Vassalle</i>	H561
Absence of active cutaneous vasodilation associated with congenital absence of sweat glands in humans <i>G. L. Brengelmann, P. R. Freund, L. B. Rowell, J. E. Olerud, and K. K. Kraning</i>	H571
Cardiac contractility and sarcolemmal calcium binding in several cardiac muscle preparations <i>D. M. Bers, K. D. Philipson, and G. A. Langer</i>	H576
Reduction in cardiac contractility during upper respiratory stimulation with cigarette smoke <i>D. O. Robleto and D. F. Peterson</i>	H584
Sympathetic neural effects on regional atrial recovery properties and cardiac rhythm <i>F. A. Kralios and C. K. Millar</i>	H590
Antipyrine and aminopyrine permeability of individually perfused frog capillaries <i>F. E. Curry</i>	H597
Regulation of coenzyme A synthesis in heart muscle: effects of diabetes and fasting <i>D. K. Reibel, B. W. Wyse, D. A. Berkich, and J. R. Neely</i>	H606
Effects of hyperkalemia and glycoside on thallium exchange in rabbit ventricle <i>J. Krivokapich and K. I. Shine</i>	H612
Contrasting reflex influences of cardiac afferent nerves during coronary occlusion <i>L. C. Weaver, L. M. Danos, R. S. Oehl, and R. L. Meckler</i>	H620
Cardiac cyclic nucleotides and norepinephrine during neural sympathetic stimulation <i>M. T. Pindok, E. Sukowski, and V. V. Glaviano</i>	H630
Electrophysiological effects of insulin on normal and depressed cardiac tissues <i>V. R. LaManna and G. R. Ferrier</i>	H636
Effect of arterial stretch on transmural albumin and Evan's blue dye transport <i>D. L. Fry, R. W. Mahley, and S. Y. Oh</i>	H645
Increased activity of carotid sinus baroreceptors by sympathetic stimulation and norepinephrine <i>E. Tomomatsu and K. Nishi</i>	H650

SPECIAL COMMUNICATIONS

Exogenous substrate utilization in Ca^{2+} -tolerant myocytes from adult rat hearts <i>J. Montini, G. J. Bagby, A. H. Burns, and J. J. Spitzer</i>	H659
An improved transducer for measurement of cardiac dimensions with sonomicrometry <i>P. Van Tighout III, B. J. Bauer, C. O. Olsen, J. S. Rankin, and A. S. Wechsler</i>	H664
Effects of high-frequency harmonics on cardiac relaxation indices <i>G. Martin, J. V. Gimeno, A. Ramirez, J. Cosin, and J. Baguena</i>	H669
Maximal negative dP/dt as an indicator of end of systole <i>F. L. Abel</i>	H676

No. 5. MAY 1981

Hail and farewell <i>A. P. Fishman</i>	H681
---	------

Cardiovascular and body fluid changes after aortic baroreceptor deafferentation <i>A. H. Werber and G. D. Fink</i>	H685
Adrenoceptor desensitization after immobilization stress or repeated injection of isoproterenol <i>I. Yamaguchi, T. Torda, F. Hirata, and I. J. Kopin</i>	H691
Enhanced β -adrenergic-receptor responsiveness in hypoxic neonatal pulmonary circulation <i>J. E. Lock, P. M. Olley, and F. Coceani</i>	H697
Ca^{2+} sensitivity change and troponin loss in cardiac natural actomyosin after coronary occlusion <i>T. Toyo-Oka and J. Ross, Jr.</i>	H704
Dependency of myocardial reactive hyperemia on coronary artery pressure in the dog <i>W. P. Dole, W. J. Montville, and V. S. Bishop</i>	H709
Carotid sinus distension and superior cervical ganglion transmission <i>R. S. Tuttle and M. McCleary</i>	H716
Baroreceptor output during normal and obstructed breathing and Mueller maneuvers <i>R. S. Fitzgerald, J. L. Robotham, and A. Anand</i>	H721
Inhibitory effect of anoxia on reperfusion- and digitalis-induced ventricular tachyarrhythmias <i>P. Carbonin, M. Di Gennaro, R. Valle, and A. M. Weisz</i>	H730
Autonomic nervous system and cellular injury from circumflex ligation in dogs <i>J. J. Elson, R. E. Ten Eick, and D. H. Singer</i>	H738
Muscle microcirculation: effects of tissue pH, PCO_2 , and PO_2 during systemic hypoxia <i>R. J. Morff, P. D. Harris, D. L. Wiegman, and F. N. Miller</i>	H746
Effects of prostaglandin D_2 on perinatal circulation <i>S. Cassin, M. Tod, J. Philips, J. Frisinger, J. Jordan, and C. Gibbs</i>	H755
Oxygen fields in specific spinal loci of the canine spinal cord <i>B. T. Stokes, M. Garwood, and P. Walters</i>	H761
Pharmacologic- vs. ischemia-induced coronary artery vasodilation <i>D. C. Warltier, G. J. Gross, and H. L. Brooks</i>	H767
Effect of adenosine and dipyridamole on cerebral blood flow <i>D. D. Heistad, M. L. Marcus, J. K. Gourley, and D. W. Busija</i>	H775
Role of vasa vasorum in nourishment of the aortic wall <i>D. D. Heistad, M. L. Marcus, G. E. Larsen, and M. L. Armstrong</i>	H781
Sodium and angiotensin in the pathogenesis of experimental renovascular hypertension <i>A. A. Seymour, J. O. Davis, R. H. Freeman, J. M. DeForest, B. P. Rowe, G. A. Stephens, and G. M. Williams</i>	H788
Abnormalities in baroreflex control of heart rate in canine heart failure <i>C. W. White</i>	H793
Glutathione peroxidase, selenium, and prostaglandin synthesis in platelets <i>M. G. Doni, G. L. Avventi, L. Bonadiman, and G. Bonaccorso</i>	H800

Blood flow and high-energy phosphates in microregions of left ventricular subendocardium <i>H. D. Kleinert and H. R. Weiss</i>	H804
Restoration of cardiac function and myocardial flow by collateral development in dogs <i>M. V. Cohen and T. Yipintsoi</i>	H811

ANNOUNCEMENTS H820

No. 6. JUNE 1981

Continuous positive-pressure ventilation does not alter ventricular pressure-volume relationship <i>J. E. Fewell, D. R. Abendschein, C. J. Carlson, E. Rapaport, and J. F. Murray</i>	H821
Role of vasopressin, catecholamines, and plasma volume in hypertonic saline-induced hypertension <i>P. Hatzinikolaou, H. Gavras, H. R. Brunner, and I. Gavras</i>	H827
Estimation of open-loop gain of canine arterial pressure control system by a new method <i>H. Hosomi and K. Yokoyama</i>	H832
Norepinephrine effect on <i>in situ</i> venous membrane potential in spontaneously hypertensive rats <i>D. R. Harder, S. J. Contney, W. J. Willems, and W. J. Stekiel</i>	H837
Transcapillary Starling pressures in the fetus, newborn, adult, and pregnant adult <i>R. A. Brace and J. L. Christian</i>	H843
Role of renin-angiotensin system in response to hemorrhage in fetal sheep <i>H. S. Iwamoto and A. M. Rudolph</i>	H848
Effect of various degrees of systemic arterial hypertension on acute canine myocardial ischemia <i>L. D. Hillis, C. Izquierdo, C. Davis, S. Brotherton, R. Eberhart, P. G. Roan, and J. T. Willerson</i>	H855
Pressor responses to vasopressin in rabbits with 3-day renal artery stenosis <i>J. A. Johnson, S. Ichikawa, K. D. Kurz, W. L. Fowler, Jr., and C. G. Payne</i>	H862
Cutaneous and skeletal muscle vascular responses to hypothermia <i>T. C. Major, J. M. Schwinghamer, and S. Winston</i>	H868
Carotid chemoreceptors and vagi in hypoxic and cyanide-induced tachycardia in the dog <i>P. D. Gupta and M. Singh</i>	H874
Blood flow in the hypertrophied right ventricular myocardium of unanesthetized ponies <i>M. Manohar, G. E. Bisgard, V. Bullard, and J. H. G. Rankin</i>	H881
Cardiac catecholamine stores after cardiac sympathectomy, 6-OHDA, and cardiac denervation <i>D. V. Priola, W. J. O'Brien, W. G. Dail, and W. W. Simpson</i>	H889
Measurement of left and right ventricular volume from implanted radiopaque markers <i>W. P. Santamore, R. Carey, D. Goodrich, and A. A. Bove</i>	H896
Muscle and nonmuscle cell RNA polymerase activities in early myocardial hypertrophy <i>A. F. Cutilletta</i>	H901
Effect of volume expansion on pressor response to angiotensin II in pregnant ewes <i>S. Matsuura, R. P. Naden, N. F. Gant, Jr., C. R. Parkers, Jr., and C. R. Rosenfeld</i>	H908
Intrarenal vascular effects of angiotensin I and angiotensin II <i>S. L. Britton</i>	H914
The relative role of subendocardium and subepicardium in left ventricular mechanics <i>H. N. Sabbah, M. Marzilli, and P. D. Stein</i>	H920
Isovolumetric properties of ventricles of spontaneously hypertensive rats <i>L. J. Heller</i>	H927
Effect of thyroid hormone on canine cardiac Purkinje fiber transmembrane potential <i>J. M. Jaeger, S. R. Houser, A. R. Freeman, and J. F. Spann, Jr.</i>	H934
Transmural distribution of blood flow during activation of coronary muscarinic receptors <i>G. J. Gross, J. D. Buck, and D. C. Warltier</i>	H941

(Continued)

(Contents continued)

Stability of an experimental atrioventricular reentrant tachycardia in dogs <i>M. B. Simson, J. F. Spear, and E. N. Moore</i>	H947
Contractile dysfunction of atrial myocardium from endotoxin-shocked guinea pigs <i>J. L. Parker and H. R. Adams</i>	H954
Different sites of adenosine formation in the heart <i>W. Schütz, J. Schrader, and E. Gerlach</i>	H963
Contractility of vascular smooth muscle: maximum ability to contract in response to a stimulus <i>N. Skaug and R. Detar</i>	H971
